## EDUCATION

- **Samsung IT School** (2019)
- **Engineering lyceum of NSTU** (2018 - 2020)
- **Online schools and courses:**
  - ◆ [learn.javascript.ru](https://learn.javascript.ru)
  - ◆ [W3Schools.com](https://W3Schools.com)
  - ◆ [HTMLAcademy.ru](https://HTMLAcademy.ru)
- **A lot of self-studying**

## PERSONAL PROJECTS

### **Movie Searcher**

[Repo](#)

[Live preview](#)

React client for the OMDb database. Search movies by title and additional filters, get full information such as plot, actors, ratings and more.

### **2che Website**

[Repo](#)

[Live preview](#)

The beautiful website I created from the PSD template.

### **Browser Snake Game**

[Repo](#)

[Live preview](#)

Snake and field settings can be edited. Almost all the elements are interactive, you can drag the snake cage and drop it to the field, take the candy gift and more.

### **React Todo App**

[Repo](#)

[Live preview](#)

Elegant todo app. Create, edit, sort, delete, save your todos enjoying a nice interface.
